## **CLIMATE EMERGENCY**

## We the undersigned call upon Swansea Council to urgently:

- 1. **Join other councils** across the Wales and the UK to **declare climate emergency** and call upon Welsh and UK Governments to do the same, and also
- 2. Tell the truth about climate change and the threat to life and work with local experts to see what more we could possibly do as a council and community working together. Listen to youth. Publicise and explain Swansea's extensive earth-friendly initiatives in response to climate emergency, including initiatives in construction and housing, recycling etc., and condemn the UK Government's failure to to support these initiatives including the tidal lagoon, and the cancellation of rail electrification to Swansea.
- 3. Be carbon neutral by 2030.
